

I HAVE HEALTH IN MY BASKET / SEPETİMDE SAĞLIK VAR

School Website Link:

Our project is carried out in the 2020-2021 Academic Year.

About the Project

Healthy eating is the first condition of a healthy life. It is an inevitable necessity for a society to gain the right nutritional habits to its children in order to raise strong generations physically and spiritually. Collaborative practices will be made to create nutritional habits that will make students a lifestyle. Our aim in our project is to create awareness of nutrition and active life by making applications in cooperation with our students, parents and all our partner schools, and to create awareness of healthy nutrition both in their schools and at their homes. With the awareness of life, we aim to bring in strong, self-confident and happy individuals to the society and thus to be a step towards raising healthy generations.

Registration Certificate And National Quality Label Certificate Of Our Project
